

Meet the UK Equities Team

Investment success requires a blend of skills and abilities, both emotional and intellectual, honed over many years and applied with passion and intensity in the search for under-appreciated, high quality businesses in which to invest. The team are stock pickers with a well-defined approach that focusses on best-in-class businesses generating growing streams of free cash flow. They are disciplined to only purchase shares when they believe these qualities are not fully appreciated in current stock-market valuations. It is through this application of analytical rigour and portfolio discipline that they expect to meet our client's objectives.
